What is a 1.2 volt battery?

1.2v batteries tend to be made up of NiMH(Short for Nickel Metal Hydride) or NiCd (Nickel Cadmium). These batteries are labeled as high-density; which comes at the expense of reduced cycle life. But on the other hand,common 1.5-volt batteries tend to be made up of common alkaline or lithium.

What batteries do solar lights use?

The AA NiCad 600mAhbutton batteries used in these lights are specifically designed to meet the demands of outdoor use. They are capable of delivering consistent power,even in low-light conditions,which is essential for ensuring that your solar lights stay on throughout the night.

Is a 1.2V battery better than a 1.5V battery?

While it is true that a 1.2v battery has a lesser voltage than a 1.5v battery,it is not a downside. As most devices that require a 1.5v voltage supply,are designed in a manner to operate at lower voltages than that. Since a 1.2v battery can hold a steady voltage,they are more than qualified to be used in such a device.

Can a 1.5 watt solar panel charge a 12-volt battery?

A 1.5-watt solar panel can run all the battery-powered devices that are compatible with 12-volt batteries. Most essentially,you can use this solar panel to charge your 12-volt vehicle battery. Sometimes,it is hard to keep the battery alive when you are not driving the vehicle.

What mAh battery do I need for my solar lights?

Many of the older solar lights are using capacities (mAh) that are lower than 600mAh. These capacities include 250mAh or 400mAh. Our Batteries are interchangeable with any lower or higher mAh Nicd AA Battery. In fact these batteries will last longer then original lower capacity Nicad battery.
