What kind of battery is in the ampere time 12V 300ah?

Ampere Time 12V 300Ah Lithium LiFePO4 Battery, Built-in 200A BMS, Max 2560W Power Output, Easy Installation, 4000+ Deep Cycles, FCC&UL Certificates, 10-Year Lifetime, Perfect for Off-Grid, RV, Solar...

Can a solar panel connect to a 12V battery?

Technically, you can connect a solar panel directly to a 12v battery as long as it's not more than 5 watts, but connecting any higher-rated panels is not a good idea. Solar panels will produce varying voltage outputs depending on the amount of sun hitting them, and this dipping and spiking of the voltage can quickly damage your battery.

How many watts is a 12V battery?

Anything under 5-10 watts is not enough, as these will only "trickle charge" your battery very slowly. In general, 12v panels are only available up to a rating of around 200-watts; from there up they are usually 24v or 48v. There are various sizes of 12v batteries available, 100ah being the most common.
