What is a gel battery 12V deep cycle?

100AH Gel Battery 12V Deep Cycle The 100AH Gel Battery 12V Deep Cycle has super thermal stability and a high deep discharge capability. Additionally, it has good recovery from deep discharge. Even if the battery is left discharged for thirty days, it will still recover to 100% of capacity. Maintenance-free and easy to use.

What are deep cycle gel batteries used for?

Deep cycle gel batteries are developed for cyclic applications that completely rely on batteries for their daily power, such as renewable energy. High rate VRLA batteries are developed with excellent discharge characteristics.

Can I mix gel and pure gel batteries?

DO NOT mix Hybrid GEL and Pure GEL batteries together as it will reduce overall performance and may cause damage to the battery bank. To avoid cycle-life shortening, we recommend not discharging the battery below 50%.

How long does a renogy gel battery last?

Renogy Deep Cycle Hybrid GEL Battery has a design life of over 12 years. During this time, you will be able to charge and discharge the battery more than 750 times at 50% depth of discharge. When not in use, the monthly self-discharge rate of this Renogy Deep Cycle Hybrid GEL battery is as low as 3%.

What is a gel battery?

Our gel batteries, classified as a type of valve-regulated lead-acid (VRLA) batteries, incorporate a gel electrolyte to immobilize sulfuric acid, enhancing safety significantly. This design ensures spill-proof characteristics, making our gel batteries a reliable choice for a wide range of applications.
