

## Acurite solar remote battery shows red

Does acurite provide a remote battery pack?

Net is anyone that is having similar issues with the Atlas should try using the remote battery pack. Honestly IMO AcuRite should supply all Atlas owners with the remote battery pack at no charge. In early 2022, my Access device stopped working. I had installed in 2016 and it had worked without any issues.

Why is my acurite Iris's 5-in-1 sensor losing connection?

If your AcuRite Iris's (5-in-1) sensor is losing connection to the display unit and/or AcuRite Access's, the low battery icon is often present on the display, or the sensor is going through batteries too quickly, please review the troubleshooting suggestions below. We expect recommended batteries to last between 12-24 months.

Why is my acurite Iris temperature sensor not working?

The temperature sensor in your Acurite Iris may sometimes display incorrect readings. This can be due to several reasons: **Battery Problems:** Ensure the batteries are fresh and properly installed. **Placement:** Position the sensor away from direct sunlight or heat sources. **Interference:** Minimize obstructions between the sensor and the display unit.

Does my acurite Iris have power issues?

Experiencing power issues with your Acurite Iris can be frustrating. These problems can disrupt data collection and affect the performance of your weather station. Fortunately, many power issues can be resolved easily. Below, we explore common solutions for power issues in your Acurite Iris.

How do I know if my acurite sensor is good?

Check sensor batteries and verify range and placement. My sensor is in direct range of my access hub and I physically checked my batteries yesterday and they are all good. The My Acurite app shows red and shows the signal as poor, but the battery level shows normal. A few hours later everything will be green again.

Why is my acurite sensor not working?

Not available - the battery level is not available. The sensor may have no battery power or the sensor is not in wireless range of its Connection Device. During this status, the status indicator color is red. Last Update - the date and time its last reading and status was sent to My AcuRite's.
