Why should you add batteries to a solar system?

Solar batteries store extra energy made by the solar system during the day. This stored energy can get used during blackouts at night or when there isn't much sunlight. So, even if all other lights are out, you still have power! Adding batteries to a solar system can provide energy independence.

Can you add battery storage to a solar panel?

The good news is that it's entirely possible to add battery storage to an existing solar panel setup. So-called "storage ready" systems are already equipped with an inverter that can easily direct excess power into a battery. But even if your system wasn't designed with storage in mind, you still have options.

Can you add a battery to a solar inverter?

It's relatively easy to add a battery to your existing solar panel system, but the level of ease depends on the type of solar inverter you have. If your inverter isn't compatible with a battery, the simpler and more affordable solution is to install an AC-coupled battery system.

Are solar batteries compatible with existing solar panels?

Most solar batteries designed for small-scale use are compatible with existing solar panel systems. The best battery for your retrofit installation really comes down to your unique needs and reasons for installing an energy storage system.

Are battery-tied solar systems a viable option?

But until recently, they only made sense for a few, mostly off-grid solar systems due to their high cost and low efficiencies. However, as battery prices continue to decline and batteries become more and more effective, they are also becoming a viable option for many grid-tied solar systems.

Can a solar system accommodate a battery?

Most solar systems can accommodate a battery, but the ease of installation depends on your setup. Why trust EnergySage? You installed your rooftop solar system a few years ago and are enjoying your disappearing electric bills. But your neighbor just installed a new solar-plus-storage system that couples rooftop solar with a battery storage system.
