

Aegis solo battery life reddit

What battery does the aegis solo 2 use?

The Aegis Solo 2 utilizes a single external 18650 battery. It still provides reliable performance, but may require more frequent charging compared to the dual battery setup of the Solo 3. The Solo 2 also offers a wide range of power output, supporting up to 100 watts for robust performance. Geekvape Aegis Solo 3

What wattage battery should I use in my aegis?

Hi Rammstein, if you look at Baditude's post above, showing the batteries and wattages, and you are vaping up to 75 watts using any of the following will work fine for you in your Aegis. They are all highly recommended batteries by Mooch, who is the battery expert, so they are all very good batteries.

What is the difference between aegis solo & aegis mini?

The Aegis Solo and Aegis Mini have some key differences despite their similar appearances. The Aegis Solo is smaller and lighter than the Aegis Mini due to its use of an 18650 battery instead of the 2200mAh built-in battery on the Aegis Mini. The Aegis Solo also has a maximum output of 100W compared to the Aegis Mini's maximum output of 80W.

How much wattage does aegis legend use?

Well the AEGIS Legend is 200W (the largest vape [wattage wise] was 75W). Well the AEGIS Legend is 200W (the largest vape [wattage wise] was 75W). The legend won't actually go to 200W. Even with 30A drain batteries (the highest drain actually made) it will only do 180W. It's the batteries that determine actual maximum wattage not the mod.

You need to buy a 18650 battery charger & charge your batteries that way. Never a good idea to charge them in the mod unless it's an internal battery mod & you can't take them out.

Geekvape Aegis Solo "battery weak" help Hey everyone. I've been a simple vaper for years and don't know a whole lot about the tech of how everything works. In late May I ordered this after ...

I dunno how much you vape, but I get almost a whole day out of my solo. However, since you already got 2 batteries you could just carry the second one on you and ...

My Aegis Solo (and Max) battery display will appear low when the battery is still at 3.6V - but it will carry on working fine until the battery is at 3.3V (ish). I prefer this to displays ...
