

Aerizer solo battery flashing green

How do I conserve the battery life of the arizer solo?

To conserve battery life, use the Arizer Solo in a temperature controlled environment and use the lower temperature settings. When outdoors, stay sheltered from the elements and avoid using in extremely cold temperatures. Charge the battery as necessary.

How do I protect my arizer solo battery?

The Arizer Solo and Solo Chargers have built-in protections to prevent the battery from being overcharged or drained too low. To conserve battery life, use the Arizer Solo in a temperature controlled environment and use the lower temperature settings. When outdoors, stay sheltered from the elements and avoid using in extremely cold temperatures.

How long does the arizer solo battery take to charge?

The battery will take 3-4 hours to fully charge, or longer if you use it while charging. If your battery is running low, with the Arizer Solo you don't have to wait for the battery to charge before you can use it. Just plug it in, set the temperature, and use the Solo while the battery continues charging.

Does arizer solo have a warranty?

Equipped for worldwide use with an input capacity of 110-240V with international safety certifications. The Arizer Solo carries a lifetime warranty on the heating element, a limited 2-Year warranty covering defects in materials or workmanship, and a limited 1-Year warranty covering the battery. Glass is not covered under warranty.

How long do arizer batteries last?

Arizer Batteries meet rigorous quality standards. With normal use they will last for hundreds of charge cycles before losing any capacity. Dropping the battery or the unit can result in battery damage that may limit/reduce the battery capacity quickly, so it is important to handle your unit carefully.

Can arizer batteries be substituted for third-party batteries?

Arizer Batteries should not be substituted for third-party batteries-- Only use official Solo Batteries with your Arizer Solo. We cannot verify the quality or safety of other batteries, and using third-party batteries can result in personal injury, electric shock, and damage to the device which is not covered under warranty.
