Does Aldi have a solar battery?

A 6.08kW rooftop solar panel array is not large by 2025 standards, and Aldi's inclusion of a battery is even more of a reason for a larger solar panel array. SolarQuotes' resident fact checker Ronald Brakels explains: "the more solar you have the more able you are to charge your battery in winter or periods of lousy weather."

Does Aldi offer solar panels?

Unlike most other solar deals, the Aldi offer includes both panels and a backup battery with customers able to get access to bespoke software and professional installers, who have been specifically chosen because of their knowledge of electrical systems and are skilled in solar installations.

Does Aldi sell solar panels in Melbourne?

Aldi is shaking up the home solar market with a new, Melbourne-only offering. The multi-national, ultra-cheap retailer is now marketing a solar and battery package that includes 6kW of solar panels, a 5kW hybrid inverter and a 5.1kWh lithium ion phosphate (LiFePO4) battery, all for the princely sum of \$7,999 - inclusive of installation.

How much does Aldi solar kit cost?

Not to mention, it's portable. So, whether the user is camping, boating, hiking, or doing some other outdoor activity, they can fold the mat up, carry it, and set it up wherever there is sun. This solar kit is retailing for A\$229 at ALDI, either online or in store.
