If you have any questions or need additional information please contact us. Alpan Products Retailers FAQ's

What batteries do you use for solar lights?

The Camelion Batteries for Solar Lights are my go-to when it comes to 1.5V batteries. They come with a modest 300mAh capacity, but that powers up my holiday decorations lights for about 4 hours per night. I also appreciate the safe and stable NiCAD cells that work in cold winter and hot summer days without any problems.

Are EBL batteries good for solar lights?

Despite that, the EBL Batteries for Solar Lights are still super reliable and affordable- making them a great choice if you want to invest in NiCAD batteries. The JESSPOW Batteries for Solar Lights come with a large 1,600mAh capacity and 3.7 voltage, guaranteeing that no matter how long the night, your lights will stay lit up.

Are powerowl batteries good for solar lights?

However, considering their longevity and reliability, I find the POWEROWL Batteries to be a worthwhile investment for anyone looking to power their solar lights effectively. The Brighttown Batteries for Solar Lights offer a capacity of up to 2,400mAh, which is enough for most solar lights to stay lit all night.

Are jesspow batteries good for solar lights?

The JESSPOW Batteries for Solar Lights come with a large 1,600mAh capacity and 3.7 voltage, guaranteeing that no matter how long the night, your lights will stay lit up. I use these batteries for my solar tiki torches and they flicker on and off for over 7 hours every night which is more than enough for my summer barbecues.
