

Arlo solar panel draining camera battery

How does the Arlo solar panel work?

The Arlo Solar Panel is designed to provide trickle charging to keep your camera battery charged, not to charge your camera battery from low to full. Reduce your camera usage for a day or two and note your camera battery level.

How do I charge my Arlo camera?

Ensure the Arlo camera battery is fully inserted and that you are charging it with the Arlo Solar Panel. The Arlo Solar Panel charges the battery, but it cannot power the camera if the battery is not installed. Make sure your camera battery is fully charged when you connect the Arlo Solar Panel to your camera.

Does Arlo solar panel drain battery?

If you have a bad solar panel that is still under warranty, you may be able to have it replaced with a new one. Overall, the Arlo solar panel should not drain the battery, but rather, it should provide the battery with a reliable charging source. In most cases, a drained battery is a result of the solar panel itself and not the camera battery.

What should I do if my Arlo solar panel is not working?

Reduce your camera usage for a day or two and note your camera battery level. Heavy usage of your camera can drain the camera battery faster than the Arlo Solar Panel can recharge it, especially with poor sun exposure. Remove dirt and debris from the surface of the Arlo Solar Panel.

Why are my Arlo solar panels not charging?

If your Arlo solar panels are not charging, it could be because the battery in your camera is too cold or too hot. Start by confirming that your solar panel is compatible with the Arlo camera you have, then unplug and reinsert the cables from the panel, checking for any damaged or exposed wiring.

Can Arlo solar panels charge a security camera?

Arlo solar panels are designed to keep Arlo security cameras charged, but they aren't designed to charge them from a low to a full battery level. If you have an Arlo system, make sure you recharge the battery first before using it with the solar panel.

Did Arlo recently push a base station firmware update that caused a rapid depletion of camera batteries? I have several different camera models, normally go months without recharge, and ...

If your Arlo solar panels are not charging, it could be because the battery in your camera is too cold or too hot. Start by confirming that your solar panel is compatible with ...

The solar panel is probably heating up with the energy it is sucking out of the camera battery. So when you first get one of these, don't assume the green symbol means all ...
