

Aussie batteries and solar watt meter

Can I use a watt meter with a portable solar panel?

This watt meter is a perfect companion to our range of Portable Solar Panels. It can be easily installed in-line between your solar regulator and batteries/load, making it ideal for portable solar setups.

Where can I buy the XTM 12V watt meter?

Stay on top of your power usage with the XTM 12V Watt Meter--simple, reliable, and informative! Buy the XTM 12V Watt Meter online at BCF, Australia's leading retailer for Camping Solar Panels and Blankets, available online or instore.

How does a battery watt meter work?

Enter the Battery Watt Meter, a simple device that is easily installed and provides you with all the key ratings of your battery loads in real time. Installation is easy - the watt meter has two ring terminals for connecting to your battery, and an Anderson plug for loads. The device is installed in-line between your battery and loads.

How do I use the Baintech watt meter?

The Baintech Watt Meter allows you to closely monitor how much charge your solar panels are producing. Simple to connect: simply plug your regulated solar source to the 'source' side of the watt meter, and your battery/load to the 'Load' Anderson connector.

How do I install a watt meter for my solar panel?

To install our Watt Meter, connect the solar panel regulator's output to the labelled 'source' side of the watt meter, and then connect the battery/load cabling to the 'load' side. The watt meter is installed in-line between your solar regulator and batteries/load, making it easy to set up.
