

Austin energy solar battery

Is Austin Energy a solar company?

Austin Energy, not a solar company, is the city-owned electric utility of Austin, Texas. They have issued a press release urging its customers to be wary of phone or door-to-door residential solar salespeople claiming to be utility or city employees.

Does Austin Energy offer a solar rebate?

Austin Energy does not offer additional rebates for battery systems. You must have an Austin Energy residential electric utility account. Your solar system must be new and cannot yet be installed before you apply for a rebate. The solar system must be connected to an Austin Energy residential electric account where the system will be installed.

How will solar power impact Austin Energy?

Solar produces power when generation is needed the most. Combined with the utility's other renewable energy contracts, these resources move Austin Energy closer to 100% carbon-free electric generation by 2035 and to supplying 65% of customer energy needs with renewable energy by 2027.

How much does Austin Energy charge for solar?

Learn more below. Value of Solar Bill Credits: Austin Energy credits residential solar production at the current Value of Solar Rate of 9.91 cents per kWh. Learn more about how customers are billed.

How does Austin Energy help with solar installation?

Earn rebates from Austin Energy that can help with the installation. Earn up to 9.91 cents/kWh in Value of Solar Bill Credits that apply to the electric charges on your utility bill. Explore tax benefits for solar installations. Apply for incentives from Austin Energy that can help with installation costs.

How do I install a solar system in Austin?

The solar system must be connected to an Austin Energy residential electric account where the system will be installed. You must use an Austin Energy Participating Contractor to install your solar system - see participating solar contractors. The solar system must be 3kW (DC) or larger, and mostly free of shading.
