

Australian government solar battery program

Does Australia have a solar battery rebate?

The Australian federal government's solar battery rebate, the "Cheaper Home Batteries Program" has officially begun as of the 1st July 2025. It offers an upfront discount of around 30% of the upfront cost or a maximum of \$372 per usable kilowatt-hour (kWh).

How will Australian government fund solar batteries?

The Australian Government will fully fund the discount for solar batteries by purchasing small-scale technology certificates (STCs). This means no costs will be passed on to householders through energy retailers. Household batteries will assist in balancing electricity supply and demand across the whole grid.

Can you get a discount on solar batteries in Australia?

The Australian Government's Cheaper Home Batteries program will provide \$2.3 billion in support for households and small businesses to reduce the cost of installing eligible small-scale solar batteries. If you want to install a solar battery at your home or business, you may be able to get a discount on the purchase price of your system.

What is Australia's cheaper home batteries program?

From 1 July 2025, the Australian Government's Cheaper Home Batteries Program is providing around a 30% discount on the cost of installing a battery as part of an expansion to the SRES. Rebates and loans are also provided by some state and territory governments and local councils.

What is the federal solar battery rebate?

The Federal Solar Battery Rebate is a \$2.3 billion subsidy scheme by the Australian Government, officially known as the Cheaper Home Batteries Program. It is a nationwide solar battery incentive designed to accelerate battery adoption across Australia to reduce home battery installation costs by around 30%.

How can Australians save money on solar energy?

store cheap renewable energy generated during the day for use when it is needed most.
