

Australian government solar battery rebate

Does Australia have a solar battery rebate?

The Australian federal government's solar battery rebate, the "Cheaper Home Batteries Program" has officially begun as of the 1st July 2025. It offers an upfront discount of around 30% of the upfront cost or a maximum of \$372 per usable kilowatt-hour (kWh).

What is the federal solar battery rebate?

The Federal Solar Battery Rebate is a \$2.3 billion subsidy scheme by the Australian Government, officially known as the Cheaper Home Batteries Program. It is a nationwide solar battery incentive designed to accelerate battery adoption across Australia to reduce home battery installation costs by around 30%.

Do you need a federal government battery rebate in Australia?

A lot of pent-up demand exists for a federal government battery rebate in Australia. This is why (good) installers are very thin on the ground for battery installs. And sadly, we're already seeing some shonky advertising misrepresenting the Cheaper Home Batteries Program, confusing and misleading people.

How does a solar battery rebate work?

The solar battery rebate is calculated based on your battery's usable capacity-- the amount of energy your home or business can use. You'll get STCs (small-scale technology certificates) for each kWh of usable battery capacity, up to 50 kWh. In 2025, this means a discount of about \$372 per kWh.

Can I get a solar battery rebate if I already have a battery?

The national Solar battery incentive applies to homes with either new or existing rooftop solar systems. What if I already have a battery? You can still install an additional battery and qualify for the government solar battery rebate if it is at a different eligible property. Can landlords claim the federal rebates on multiple properties?

How will Australian government fund solar batteries?

The Australian Government will fully fund the discount for solar batteries by purchasing small-scale technology certificates (STCs). This means no costs will be passed on to householders through energy retailers. Household batteries will assist in balancing electricity supply and demand across the whole grid.
