These batteries can be charged by solar lights or battery charger. Suggest to use battery charger when sunlight is not enough. Power life is up to 24 months.

Should I buy a battery for my solar lights?

Before buying a battery for your solar lights, it's important to check the voltage and amperage they need. For instance, if your light needs 3.7V and 2A, your battery should match these requirements. If the battery's voltage is too high, it could harm your lights. If it's too low, the lights won't get enough power to function properly.

The best batteries for solar lights are typically Nickel-Metal Hydride (NiMH) or Lithium Phosphate (LiFePO4) due to their capacity, durability, and eco-friendliness.
