

# Batteries for solar power price

How much does a solar battery cost?

Historically, solar batteries have had a reputation for being prohibitively expensive, with many recorded instances where adding storage doubled the cost of a home solar installation. You can expect to pay between \$7,000 and \$18,000 for a solar battery.

Should I buy a solar battery?

It is obviously much more attractive to buy a solar battery if part of the cost is going to be funded by some form of rebate or tax credit. If you are buying a battery bank to store solar energy then you can claim the 30% federal solar tax credit on it.

Is solar battery storage worth the cost in 2025?

Whether solar battery storage is worth the cost in 2025 is totally up to you and your energy goals. If you experience frequent or long-lasting power outages, then having battery storage for backup power can be a game-changer in keeping you safe, productive, and comfortable (not to mention keeping your food from spoiling!).

How much does a battery cost on EnergySage?

On EnergySage, Pytes USA Energy offers some of the most affordable batteries at about \$651/kWh. You'll typically pay the most for Enphase batteries, which cost about \$1,510/kWh. \*The average price per kWh of the 10 most quoted batteries on EnergySage in the first half of 2025 (excluding Panasonic, which is closing its solar and storage business).

Can solar batteries save you money?

Solar batteries can also save you money on utility power long-term. When utility costs are at their peak, you can pivot your home's energy consumption to run off of battery power rather than grid power, leveraging the electricity your solar panels generated when you need it most.

Do solar batteries have a battery bank?

In most cases homeowners are no longer being offered solar batteries on their own they are being offered complete home storage systems. Leading products such as the Tesla Powerwall and the Sonnen eco do contain a battery bank but they are much more than this.
