Why is my battery tender junior flashing a red light?

If the red light is flashing on your battery tender Jr, that is a clear sign that your charger is connected to the power, and that there are no problems on the charger's AC power end. Review - Deltran Battery Tender Junior - No More Dead Batteries on the Corvette! - YouTube

Does a 12 volt battery tender junior work?

Battery Tender Junior brand. The 12 volt works exactly as we are led to believe they should. On the 6v one, sometimes I might come back the next day and light is still red when I would expect it to be green. I've learned to disconnect it momentarily, reconnect and it quickly goes to blinking green and then solid green.

If we notice the red light remains solid even after an extended charging period, it may be necessary to disconnect the charger and test the battery voltage using a voltmeter.

Whenever the red light is on steady, a battery is connected properly and the charger is charging the battery. The red light will remain on until the charger completes the ...

Battery tender jr red light stays solid

I think if 2 different tenders stay red, there is a problem with the battery. It's not fully charging and the regulator and gen/alt are staying on all the time.

If the lights still alternate from red to green, there's a chance that the unit itself is experiencing issues. At this point, we recommend reaching out to the Battery Tender customer service team ...
