

Beats solo 2 wireless review battery life

Is the Beats Solo 2 a bad headphone?

To be clear, that doesn't mean the Beats Solo 2 is a bad headphone. In fact, as I said, it's quite good in a lot of ways. But there are arguably better wireless headphones for the money, including the Studio Wireless.

Are the Beats Solo3 2018 Wireless better than the Solo 2 Wireless?

The Beats Solo3 2018 Wireless are slightly better headphones than the Beats Solo 2 Wireless. While both headphones have a similar sound profile, the Solo3 has a noticeably better battery life with about 40 hours of continuous playback. They also take advantage of the W1 chip on iOS devices, which the Solo 2 doesn't do.

How long does the battery last on Beats Solo2 Wireless?

The Beats Solo2 Wireless have a better battery life than the and deliver up to 18.25 hours of continuous playback. They're not too difficult to pair, and remember the last synced device but the press and hold procedure can get a little tedious if you often have to switch between Bluetooth sources.

How much does a Beats Solo 2 cost?

Earlier this year I reviewed the Beats Solo 2, the significantly improved successor to one of the world's most popular headphones. I liked the Solo 2 and think it's one of the better on-ear headphones that costs about \$200 (€170, AU\$260), although it helps if you appreciate a zippier, more "exciting" sound profile.

How does the Beats Solo 2 wireless work?

One of the more impressive elements of the Beats Solo 2 Wireless is how subtly wireless has been integrated. There are no battery compartments or ugly buttons to deal with. They use an integrated lithium battery, charged using a Micro USB port on the right cup.

Are the Beats Solo 2 Wireless waterproof?

Unfortunately, the Beats Solo 2 Wireless are not waterproof. They come with a pouch that protects from minor scratches but not from water damage or hard falls as it is soft and permeable. The Beats Solo 2 are well-built headphones that make use of high-end materials in their design.

Upgrade your music experience with the Beats by Dr. Dre Solo 2, featuring a sleek and slim profile, proprietary speaker system, and up to 20 hours of battery life.

Times have changed - Bluetooth headphones no longer suck battery life like a thirsty toddler with a juice box. Beats says that the headphones should last for around 12 hours ...

Purists may recoil in horror, but nobody buys Beats headphones for the flat response, reference-style sound signature. Most listeners will be pleased with the versatility and balance.

Beats solo 2 wireless review battery life

The power button sits on the right, with five small LEDs underneath it to show how much battery life you have left - Beats' claim of around 12 hours seems accurate to us and, for their size, pretty generous to boot.
