

Beats solo 3 battery drain

How long does a Beats Solo 3 battery last?

Thanks to a battery life of 40 hours, Beats Solo 3 Wireless is your perfect everyday reliable headphone. With Fast Fuel, a 5-minute charge gives you 3 hours of playback. Have a great sound and voice experience with on-ear controls and beam-forming mics for some quality wireless listening freedom.

Why are my beats solo3 wireless headphones draining so fast?

Your Beats Solo3 Wireless should provide you with 40 hours of music playback when charged properly. The headphones draining so fast may be due to several reasons, which stem from the battery. For reference, the batteries powering the Apple headset are of the lithium polymer variety.

Why is my beats solo3 battery draining so fast?

If you're blasting the headphones at full volume every second you use, you'll likely see a dip in battery performance. The same can be said for being too far away from your device. If your phone and the Beats Solo3 are struggling to stay paired over Bluetooth, you'll likely burn through the battery power a little faster.

Can I use the beats solo3 while plugged in?

Aside from the physical risks, you also contribute to delay when using the Beats Solo3 while plugged in. Since the battery is being used while charging, your headphones will take longer to replenish their energy supply. As such, it's not recommended to use the Apple headset when plugged into power.

Does the beats solo3 have a charging cable?

Luckily, the Beats Solo3 has a charging cable in its package, among other interesting accessories. In the case that you haven't bought them brand-new, get yourself a micro-B USB cable. Pair this cable with an 18W (9V 2A) adapter, and you'll replenish your battery at lightning speed.

How do I remove the battery from my beats solo3 wireless?

Using a prying tool, remove the casing that covers the right side of your Beats Solo3 Wireless. Note that you should be extra gentle when unclipping the earcup housing, as they will be put back later on. Reach over and remove the linkage connecting the battery to the headphones.
