

Professor of Chemical Engineering and Carbon Science, Beijing University of Chemical Technology - Cited by 79,844 - Carbon Materials - Coal Chemistry - Energy Storage and...

Xie Jingchao, associate professor and doctoral supervisor, has worked in the College of Architecture and Civil Engineering of Beijing University of Technology since October 2006.

In the context of China's ongoing industrial revolution and technological transformation, there is a growing demand for advanced energy management solutions and the increasing role of ...

The most researches on single-tank thermal energy storage focused on temperature stratification to improve its heat discharging efficiency using water ...

Chapter 10-Latent heat thermal energy storage devices. Royal Society of Chemistry, 2019. (Edited for publication). Personal Statement Li Qi was first trained as a process engineer at China ...

1. Expert of Energy Storage and Hydrogen Energy for the Ministry of Science and Technology; 2. Executive Director of the IEEE PES Energy Storage Technical ...

The analysis focuses on various energy storage technologies with statistics on patents issued by researchers or institutions from these countries.

Hao-Bin ZHANG, Professor | Cited by 14,511 | of Beijing University of Chemical Technology, Beijing (buct) | Read 94 publications | Contact Hao-Bin ZHANG

My research focuses on Electrochemical Energy Storage Materials, and their applications in secondary batteries and capacitors.

Wang is currently a professor at the University of Science and Technology Beijing, China. His research focuses on energy conversion and storage technology, new-type energy storage ...

To increase the share of renewable energy in buildings, thermochemical energy storage stands out in the high energy storage density and long-term storage capability.

He is an associate professor at Qingdao Institute of Bioenergy and Bioprocess Technology, Chinese Academy of Sciences. He received his PhD degree from the Dalian University of ...

The rapid expansion of renewable energies asks for great progress of energy-storage technologies for sustainable energy supplies, which raises the compelling demand of high ...

He is an associate professor at Qingdao Institute of Bioenergy and Bioprocess Technology, Chinese Academy of Sciences. He received his PhD degree from ...

His researches focus on the research and development of high temperature thermal energy storage such as molten salt. He also co-compiles the national standard for "solar energy in low ...

&lt;p&gt;A quasi-passive energy storage design and analysis of the lower extremity exoskeleton was proposed to alleviate the burden of the key bearing joints and assist walking. In combination ...

Li WANG, Professor | Cited by 4,160 | of University of Science and Technology Beijing, Beijing (USTB) | Read 374 publications | Contact Li WANG

The growing demand of advanced electrochemical energy storage devices for various applications, including portable electronic products, electric vehicles, ...

CiteScore SJR SNIP 23.6 3.165 1.696 Energy Energy Engineering and Power Technology 6/272 97% Energy Fuel Technology 4/128 97% Chemistry Electrochemistry 3/60 ...

Yuxiang HU, Professor (Full) | Cited by 5,804 | of Beijing University of Technology, Beijing (Bei Gong Da) | Read 80 publications | Contact Yuxiang HU

The growing demand of advanced electrochemical energy storage devices for various applications, including portable electronic products, electric vehicles, and large-scale energy ...

1 &#0183; Furthermore, the paper summarizes the current applications of energy-storage technologies in power systems and the transportation sector, ...

The Compressed Air Energy Storage (CAES) system is a promising energy storage technology that has the advantages of low investment cost, high safety, long life, and is clean and non ...

Zhongbao Liu, professor and Master/ Doctoral supervisor, he carried out research and application on industrial energy saving and waste heat utilization, building and house appliance energy ...

He obtained a Ph.D. degree at UQ under the supervision of Prof. Lianzhou Wang. His research focuses on high-safety energy storage, multivalent metal-ion batteries, photo/electrocatalytic ...

The most researches on single-tank thermal energy storage focused on temperature stratification to improve its

heat discharging efficiency using water as heat storage media.

Lead-acid batteries (LABs), a widely used energy storage equipment in cars and electric vehicles, are becoming serious problems due to their high environmental impact.

Progress and Prospects for Research and Technology Development of Supercritical CO<sub>2</sub> Thermal Conversion Systems for Power, Energy Storage, ...

He is the head of the energy chemistry major of Beijing University of Chemical Technology and a member of the academic committee of the Beijing Key Laboratory of Advanced Battery ...

His researches involve the advanced materials for energy storage devices. Until now, Dr. Yu has published over 100 papers in peer-reviewed journals including ...

North China University of Technology, located in the western part of Beijing, is a municipal university founded in 1946. Co-established by Beijing and central government, NCUT is ...

Core courses: Mathematical Models, Advanced Topics of Engineering Thermophysics Fundamentals.  
Featured courses: Advanced Topics of Modern Thermal Engineering and ...

By identifying these research frontiers, our study provides insights into the potential future directions for research and development (R& D) deployment in energy storage technologies.
