Inverters are essential for converting solar panel DC output into home-usable AC power--your solar system won't work without one. Top inverter types include string inverters (budget-friendly), microinverters (great for shade), and hybrid inverters (battery-ready).

Which solar inverter should I buy in 2025?

Every solar system needs some kind of inverter to convert sunlight into usable electricity. CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025.

What is a solar inverter?

The solar inverter is one of the most important parts of a solar system and is often overlooked by those looking to buy solar energy. This review highlights the best inverters from the world's leading manufacturers to ensure your solar system operates trouble-free for many years.

What are the different types of solar inverters?

There are a few different types of inverters, each designed with unique applications in mind. String inverters are the most traditional type. They connect a series (or "string") of solar panels to a single inverter. The inverter then converts all the panels' DC energy to AC energy at once.

How do I choose a solar inverter?

Several factors come into play when selecting an inverter for residential solar use, including the following:
System Goals: Determine if you aim for maximum energy independence, lower initial costs, or the ability to sell excess power back to the grid. Your goals will often point you to the right inverter.
