To help you spend your money wisely,our team of researchers analysed 27 market-leading batteries and compared them on key factors such as capacity,warranty and value for money. Find our top eight below. READ NEXT: The best solar panels for UK homes

What are the best solar batteries?

Today's best solar batteries are usually lithium-ion based,utilizing either LFP,NMC or another type of battery chemistry. While lead-acid batteries can function well for single-appliance applications or small energy systems,lithium-based options are going to be the best choice for daily performance and long-term value.

What are the best batteries for a solar-plus-battery system?

Here are the key specs of our top batteries: A solar-plus-battery system can slash your energy bills. You'll get the biggest saving if your battery automatically knows when to store and use solar energy, how much to store, and when to utilise off-peak electricity instead. Duracell's Dura5 battery is brilliant at doing this.

Are solar batteries worth it?

Solar batteries are expensive-- usually adding between \$10,000 and \$20,000 to an already high solar installation cost of \$29,970,on average,in the U.S. -- and can often double your solar installation costs if you want full backup capabilities for your home. As such,many solar customers wonder if solar batteries are worth it.
