

# Blink solar panel battery replacement

What is the blink solar panel mount?

The Blink Solar Panel Mount is a wireless solar panel charging accessory that uses sunlight to power the Blink Outdoor (3rd Gen) Camera (Outdoor 4, XT and XT2 not supported). How does the Blink Solar Panel Mount work? First remove the pull-tab in the battery compartment to activate the battery.

What battery does a blink solar panel use?

The Solar Panel uses one 18650 Lithium-Ion rechargeable battery. In the event a new battery is required, please only use an 18650 battery with the following specifications: 3.7 V, 3200mAh, 11.84Wh. Where can I mount my Blink Solar Panel Mount? The Solar Panel Mount can be mounted on various surfaces including siding, stone, and wood.

Does a solar panel extend the battery life of a blink camera?

No, the Solar Panel simply provides external power to your Blink Outdoor (3rd Gen) Camera, which may extend the life of your camera's batteries. What kind of battery is used in the Blink Solar Panel Mount? The Solar Panel uses one 18650 Lithium-Ion rechargeable battery.

How do I install and Configure my Blink solar panel mount?

The following easy steps explain how to install and configure your Blink Solar Panel Mount. You must first have a fully functional Blink Outdoor (3rd Gen) camera set up in your Blink account, before attaching the camera to the mount. In addition, the lithium batteries must remain in your outdoor camera before connecting it to the solar panel mount.

Can I use a blink outdoor camera with a solar panel mount?

You must first have a fully functional Blink Outdoor (3rd Gen) camera set up in your Blink account, before attaching the camera to the mount. In addition, the lithium batteries must remain in your outdoor camera before connecting it to the solar panel mount. Other Blink outdoor cameras (Outdoor 4, XT or XT2) are not supported.

Will my Blink outdoor 3rd gen camera switch to a lithium battery?

Yes, your Blink Outdoor (3rd Gen) Camera will switch to using its internal 1.5v AA lithium batteries in the event that your Solar Panel Mount has no charge. Once your Mount has adequate charge to power your camera, it will revert back to using it after three minutes or upon the execution of a new event (ex. Live View or Motion Detection).
