Which phone has the best battery life?

A higher score generally signals better battery life, though it's not foolproof. The app is also only available on Android phones, but we didn't want to leave the iPhone out entirely. Instead, we've included the Apple phone that has performed best during our extensive testing of all recent models.

Which folding phone has the best battery life?

The Oppo Find N5 has the best book-style folding phone battery life that I've tested, and this rings true in the testing. The same applies to the Razr 60 Ultra, which proves that flip phones can be just as capable as non-flip ones. I'm very surprised by just how capable the Razr 60 Ultra battery life proves to be in this test.

Which Asus phone has the best battery life?

That's mostly thanks to the new Snapdragon 8 Elite chip, so we expect that other new phones powered by that chip, like the OnePlus 13, may soon be nipping at Asus' heels. For now, however, the ROG Phone 9 Pro takes the crown for delivering the best battery life and performance.

How do you determine the best phone battery life?

Every phone we review goes through extensive testing in addition to being put through everyday use. The test most relevant to determining the best phone battery life is our proprietary Tom's Guide Battery Life test. (You can get a full rundown of the testing we conduct in our guide to how Tom's Guide tests and reviews smartphones.)

How important is battery life when buying a new phone?

Battery life is a crucial factor to consider when buying a new phone. It is a deal-maker or breaker for me. Nothing matters if your phone isn't lasting through a workday. Typically, larger phones provide the best battery backup, thanks to their bigger batteries.
