Can I add a battery to my solar system?

So-called "storage ready" systems are already equipped with an inverter that can easily direct excess power into a battery. But even if your system wasn't designed with storage in mind, you still have options. Let's explore how easy it is to add a battery to your existing solar setup and what options you have based on your current equipment.

Can you add a battery to a solar inverter?

It's relatively easy to add a battery to your existing solar panel system, but the level of ease depends on the type of solar inverter you have. If your inverter isn't compatible with a battery, the simpler and more affordable solution is to install an AC-coupled battery system.

Can you add a battery to a solar-plus-storage system?

Going back and adding a battery later isn't always an easy "plug and play" process - depending on the circumstance, upgrading to a solar-plus-storage system may involve swapping certain solar panel system components for new, battery-friendly alternatives. Plus, some batteries are much easier to retrofit onto a solar panel system than others.

Can you add battery storage to a solar panel?

The good news is that it's entirely possible to add battery storage to an existing solar panel setup. So-called "storage ready" systems are already equipped with an inverter that can easily direct excess power into a battery. But even if your system wasn't designed with storage in mind, you still have options.

Can I install a DC-coupled battery system with a solar panel system?

If you want to install a DC-coupled battery system, we highly recommend installing your solar panel systems and battery at the same time - the complications of adding a DC-coupled storage system to an existing solar panel array will be extra costly.

Are solar batteries compatible with existing solar panels?

Most solar batteries designed for small-scale use are compatible with existing solar panel systems. The best battery for your retrofit installation really comes down to your unique needs and reasons for installing an energy storage system.
