

# Can i bring solar battery charger on plane

Can I take a solar charger on a plane?

Yes, solar chargers can be taken on a plane if they contain a battery. However, the battery should go in your carry on bag and shouldn't exceed 100Wh in power. In short, to get to those destinations in the first place you are likely to have to fly and so a common question many people have is 'can I take a solar charger on a plane'?

Can I fly with solar chargers & battery packs?

Whether you're flying domestically or planning a trip overseas, we've put together a list of tips to make traveling with solar chargers and battery packs less stressful. All of our systems and batteries are approved to fly on international and domestic flights.

Can you take solar panels on a plane?

Solar panels themselves can be taken on a plane without any restrictions, apart from size. However, there are restrictions on some lithium batteries. If your solar charger has a battery, read on to see if it is allowed.

Can You charge a phone on a plane?

If you need to charge your phone on a plane and your solar charger battery is dead, the best option is to bring a phone charging cable to plug into the built-in USB port in the plane. While many solar chargers are designed to be small to make them easy to transport, they are still significantly bulkier than a simple charging cable.

Can you bring a portable charger on a plane?

You can bring a portable charger on a plane unless you are carrying car batteries or spare lithium batteries. Check your airline's website as all major battery types are generally allowed, but each airline has its own policies.

How many Mah can a solar charger have on a plane?

In general, there are regulations on the number of milliamps per hour (mAh) a solar charger with a battery is allowed to have onboard a plane. However, the regulations don't specifically mention the number of mAh that's allowed. Instead, the FAA has limitations on the watt-hours (Wh) a lithium-ion battery is allowed to have.
