What is an energy ETF?

An energy ETF focuses specifically on companies in the energy sector,typically including oil,natural gas,and renewable energy firms. These sector ETFs work by offering exposure to energy-focused indexes,which are predefined lists of companies selected and weighted according to a set of rules.

Are ETFS a good investment?

For example, ETFs that invest in oil production may benefit from high inflation that comes from the price of oil rising. This may have a positive effect on revenue and earnings. ETFs allow investors to take a broad brush approach to the full breadth of the energy sector, or to focus on certain factors and elements within it.
