From a short weekend break to month long breaks you can use solar power your holiday. Lights, water pumps, TV's and even your fridge can be run from solar.

Can a solar panel charge a car battery?

After the winter period of little to no use a solar panel will ensure that the battery is not flat. It will act as a 12v Solar Battery Charger. When you are away and parked up you will no longer have to plug in to a power source or run your engine or generator as the battery level reduces.

How are caravan solar panels installed?

There are two main ways that caravan solar panels are installed. One is to bond the panel directly onto the roof. The other is to use a roof mount that holds the panel in place on the roof. Much depends on the type of panel you use, but both provide safe, efficient ways to secure a panel into place.

Do roof mounted caravan solar panels generate power?

Both roof mounted caravan solar panels and free standing panels generate power. Roof mounted can be fixed into place using empty space on your roof and can generate energy even when you're not there. Free standing can be directed directly at the sun but needs to be set up and cannot recharge batteries on the move or when you're not there.

Do caravan solar panels generate electricity if it's overcast?

Yes, caravan solar panels do generate power when it's overcast. While they perform at their best in direct sunlight, they can still generate electricity on cloudy days. It will take longer to recharge a battery on overcast days but it can still happen. Can I generate enough energy to power a household appliance?
