

Cataclysm dda adding solar panels not speeding up battery recharge

Does this sound about right? Make a wooden vehicle frame, put that on the roof, install solar panels, make another wooden frame downstairs, install the recharging station, and ...

Having taken about a year off, I've noticed coming back that solar panels just don't work as well as they used to. My guess is that they're doing their job, but ...

Having taken about a year off, I've noticed coming back that solar panels just don't work as well as they used to. My guess is that they're doing their job, but veeeeery ...

Basically you need a power source, be it a home made generator, solar pannels, a water wheel, ect. Then you need a battery to store power in, a car batter, large storage ...

Solar panels are incredibly slow to charge. Electric cars early on are almost difficult to use because when you drive from one town to another, it'll take several days for the power to come ...

After installing standard Solar Panels on an electric vehicle, batteries are not charged up anymore, even if the vehicle spawned with Solar Panels that previously worked.

or if one battery has sufficient charge that you are not worried about it becoming dead (just want the dead battery to have enough charge to start car for example, instead of ...

Solar panels do not need to be connected to a roof in my experience. I have a 2x1 solar vehicle that powers my base connected by a heavy duty cable to my main cooking ...

Upon loading my saved game in the experimental I found that all the (partially charged) batteries I'd installed in the RV have no charge and they aren't recharging by solar ...

A better method to recharge batteries is to build a recharging station box (the bigger version) and drop your batteries into it. The recharging is fairly slow, but it has the ...

Heya! I moved my savegame to a recent experimental, and it seems all the batteries in every car, truck and motorbike in the world are all dead. It also seems that regular ...

Car batteries can take a lot of charge, and your batteries only add a little bit. Might be that the % is just below 0.5% so it is not visible. Try removing the battery from the car ...

Cataclysm dda adding solar panels not speeding up battery recharge

Describe the bug I have an electrical grid consisting of an array of solar panels. And I have a vehicle with an array of batteries. The grid and the car are connected with an ...

I put some solar panels on an RV before switching over to the experimental. They're down the centre aisle. Upon loading my saved game in the experimental I found that ...

Just 1 storage battery is enough to leave the lights and fridge on all day. Add 2 solar panels per storage battery/electrical device and never worry again. A mounted welder will ...

For electricity you can build a "vehicle" with just a an alternator, engine (diesel or gasoline) in the same tile, a battery, a tank and a controls. You then can hook that up with a ...

Currently, I've got a bunch of solar panels outside of my base powering a storage battery, recharging station, kitchen buddy, interior lighting and a stereo system to keep mood and focus ...

Basically you need a power source, be it a home made generator, solar pannels, a water wheel, ect. Then you need a battery to store power in, a car batter, large storage battery, ect from vehicles, as you can't run ...

For power generation you want a vehicle frame with solar panels, though a lawnmower motor and alternator can be another option to generate electricity. To recharge normal batteries you also need a recharging station though car ...

Solar panels are incredibly slow to charge. Electric cars early on are almost difficult to use because when you drive from one town to another, it'll take several days for the power to come back.
