

# China construction wins bid for energy storage project

What is the largest energy storage procurement in China's history?

The tender marks the largest energy storage procurement in China's history. In what is described as the largest energy storage procurement in China's history, Power Construction Corporation of China (PowerChina) is targeting an unprecedented cumulative storage capacity of 16 GWh. The bids were opened on December 4.

How much does energy storage cost in China?

In what is described as the largest energy storage procurement in China's history, Power Construction Corporation of China (PowerChina) is targeting an unprecedented cumulative storage capacity of 16 GWh. The bids were opened on December 4. The tender attracted 76 bidders, with quoted prices ranging from \$60.5/kWh to \$82/kWh, averaging \$66.3/kWh.

How does China's new energy storage capacity affect economic development?

From the perspective of investment scale, since the "14th Five-Year Plan", the new energy storage capacity has directly promoted economic investment of more than 100 billion yuan, driving the further expansion of the upstream and downstream of the industrial chain, and becoming a "new driving force" for China's economic development.

How fast will China's new energy storage develop in 2023?

Bian Guangqi, deputy director of the Department of Energy Conservation and Scientific and Technological Equipment of the National Energy Administration of China, introduced at a press conference on the 25th that China's new energy storage will develop rapidly in 2023, with an installed capacity of more than 30 million kilowatts in operation.

What is PowerChina's storage initiative?

This storage initiative is part of PowerChina's broader equipment procurement plan announced on November 13, which also includes 51 GW of solar modules, 51 GW of inverters, 25 GW of wind turbines, and 15,240 prefabricated 35kV substations.

How will PowerChina select a qualified supplier for energy storage system equipment?

According to the previously announced plan by PowerChina, this tender aims to select qualified suppliers for energy storage system equipment for 2025-2026. After the selection, a framework agreement will be signed.
