

Clean solar battery terminals safely

How do you clean a battery terminal?

Battery terminals need to be regularly cleaned with a mixture of baking soda and distilled water using a battery terminal cleaner brush. Afterward rinse the terminals with water, ensure that all connections are tight and coat the metal components with a commercial sealant or a high temperature grease.

What precautions should you take when using a battery bank?

Proper safety precautions must be taken whenever you are near your battery bank. Use thick gloves and protective eyewear and remove all metal items. The last thing you want is to be burned by acid or electrocuted. Just in case there is an acid leak, make sure you have baking soda and water near the batteries.

How do you clean a battery cradle?

If this is the case, soak the entire case in water or a diluted baking soda solution to remove corrosion. However, in most cases you will have to patiently rub off the corrosion with a cotton swab, while the battery cradle remains in the device.

What should I do if my battery is leaking?

Keep your batteries safe and dry. Exposing your batteries to moisture, extreme temperatures, or physical damage may create a leak that produces corrosion. The safer you can keep your batteries when you're not using them, the longer they'll last and the less likely they'll be to develop corrosion. Always keep batteries indoors!

How long do solar batteries last?

If you use a good setup, your solar batteries can last 8 years. Proper safety precautions must be taken whenever you are near your battery bank. Use thick gloves and protective eyewear and remove all metal items. The last thing you want is to be burned by acid or electrocuted.

Do solar batteries go bad?

Taking good care of your solar batteries is one of the best ways to increase the life of your batteries and decrease the lifetime cost of your off-grid solar electricity system. If poorly treated, batteries can go bad in a matter of weeks, leaving you broke and in the dark. This article will be broken up into two sections.
