Who is the CEO of the long duration energy storage Council?

As CEO of the Long Duration Energy Storage Council, an executive-led global nonprofit organization with more than 60 members operating in 20 countries, Julia leads strategic planning and market and policy development activities to rapidly deploy and scale long duration energy storage to support the clean energy transition worldwide.

Why is energy storage important?

Energy storage is essential for creating a cleaner, more efficient, and resilient electric grid. Additionally, these projects will provide meaningful benefits to Disadvantaged Communities and Low-to-Moderate Income New Yorkers. Energy storage is essential to a resilient grid and clean energy system.

How much do energy storage projects cost?

America's current grid-scale energy storage projects represent \$21 billion of capital investment. Energy storage technologies have the unique capabilities to keep the lights on when the power grid is under stress.

Should energy storage be included in the electric grid?

Integrating storage in the electric grid, especially in areas with high energy demand, will allow clean energy to be available when and where it is most needed. As New York continues to invest and build a cleaner grid, energy storage will allow us to use existing resources more efficiently and phase out the dirtiest power plants.

By storing energy when the price of electricity is low and discharging that energy later during periods of high demand, energy storage can reduce costs for utilities and save families and ...
