

# Energy storage development vision investment policy

Does the energy storage strategic plan address new policy actions?

This SRM does not address new policy actions, nor does it specify budgets and resources for future activities. This Energy Storage SRM responds to the Energy Storage Strategic Plan periodic update requirement of the Better Energy Storage Technology (BEST) section of the Energy Policy Act of 2020 (42 U.S.C. § 17232 (b) (5)).

Why is DOE investing in energy storage?

The underlying motivation for DOE's strategic investment in energy storage is to ensure that the American people will have access to energy storage innovations that enable resilient, flexible, affordable, and secure energy systems and supply, for everyone, everywhere.

Why was the energy storage roadmap updated in 2022?

The Energy Storage Roadmap was reviewed and updated in 2022 to refine the envisioned future states and provide more comprehensive assessments and descriptions of the progress needed (i.e., gaps) to achieve the desired 2025 vision.

What is the EPRI energy storage roadmap?

Since its inception, the EPRI Energy Storage Roadmap was intended to guide the direction of EPRI's energy storage efforts to ensure delivery of relevant and impactful resources to its Members, the industry, and the public. The following table maps EPRI's energy storage related publications to the relevant Future State.

Is EPRI re-visioning the future of energy storage?

Now in 2024, EPRI and its Member Advisors are re-VISION-ing the desired future of energy storage with the development of the Energy Storage Roadmap 2030.

How can energy storage be used in future states?

Target future states collaboratively developed as visions for the beneficial use of energy storage. Click on an individual state to explore identified gaps to achievement. Energy storage is essential to a clean and modern electricity grid and is positioned to enable the ambitious goals for renewable energy and power system resilience.

China has unveiled an action plan to boost full-chain development of the new-energy storage manufacturing industry, aiming to expand leading enterprises by 2027, ...

The adoption of a constitutional energy reform in 2013 in Mexico opened the door for private investment in the electricity sector and directed the country towards a clean energy ...

The purpose of this report is to arm relevant decision makers with the initial layer of information they need to understand energy storage and to make informed policy, regulatory, and ...

However, to realize the full potential of energy storage technologies, robust policy frameworks are essential. This article examines the various policy frameworks that ...

5 &#0183; China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ...

In conclusion, well-designed policy and regulatory frameworks are instrumental in overcoming the barriers to renewable energy microgrids ...

HiTHIUM has secured a contract from the Saudi Electricity Company (SEC) to implement battery energy storage system projects in Saudi Arabia.

Energy storage technology is one of the critical supporting technologies to achieve carbon neutrality target. However, the investment in energy storage technology in ...

The enactment of the IRA, which contained significant new incentives for storage including availability of the investment tax credit and new manufacturing credits, helped stimulate growth ...

3 &#0183; The Ministry of New and Renewable Energy (MNRE) of India has published the country's first National Policy on Geothermal Energy, setting an initial framework for the ...

Redelfi has placed standalone battery energy storage systems (BESS) at the center of its development model, abandoning the renewable ...

These countries have the most advanced storage technologies and are constantly undertaking research, development and demonstration (RD& D) projects sponsored ...

Objective The objective of the project is to advance India's transition to renewable energy and to contribute to its climate targets by addressing challenges associated with intermittent solar and ...

2 &#0183; The global transition toward renewable energy is accelerating, and commercial and industrial (C& I) energy storage stands at the forefront of this transformation. With the release of ...

Vietnam's ambition in shifting towards renewable energy The market has welcomed the long-awaited PDP VIII, approved in late May of this year, which provides an ambitious plan through ...

In August 2025, the Politburo of Vietnam adopted Resolution 70-NQ/TW on ensuring national energy security

through 2030 with a vision to 2045.

The authors support defining energy storage as a distinct asset class within the electric grid system, supported with effective regulatory and financial policies for development ...

Key diligence areas when considering energy storage projects include evaluating the battery technology as well as the supplier and country of origin of the batteries and other ...

A third policy instrument specifically designed to foster investment in renewable energy is the combined use of quotas, also referred to as renewable portfolio standards or renewable ...

Chinese authorities unveiled several measures on Monday to promote the new-type energy storage manufacturing sector, as part of efforts to accelerate the development of ...

Energy storage resources are becoming an increasingly important component of the energy mix as traditional fossil fuel baseload energy resources transition to renewable ...

5 &#0183; Policy China targets 180 GW of new energy storage by 2027 in ambitious national plan Announced by the National Development and Reform Commission (NDRC) and the National ...

In recent years, the United States has enacted significant legislation (the Infrastructure Investment and Jobs Act in 2021 and the Inflation ...

15 &#0183; "Great British Energy will place working people, communities and British industries at its core, turbocharging clean energy across the country as part of our clean power mission." ...

To support our vision for a reliable and abundant energy system, the Solar Energy Industries Association (SEIA) is establishing goals for battery storage adoption in the United States and ...

The clean energy investment tax credits included in the Inflation Reduction Act (IRA) can be leveraged by stand-alone energy storage providers as well as by storage that is ...

The underlying motivation for DOE's strategic investment in energy storage is to ensure that the American people will have access to energy storage ...

India's energy storage sector is set to attract US\$ 56.07 billion in investments by 2032, with a five-fold growth expected between 2026 and 2032, driven by rising demand for ...

In May 2023, Maryland became the eleventh state to implement an energy storage target, committing to deploy 3 GW of storage capacity by 2033. This new law ...

# Energy storage development vision investment policy

A single policy to support energy storage would not capture the environmental benefits of storage development. Instead, the current need is to devise a bundle of policies that ...

The UAE Energy Strategy 2050 aims to triple the contribution of the renewable energy and invest AED 150 to AED 200 billion by 2030 to meet the country's ...

The Energy Storage Grand Challenge (ESGC) is a crosscutting effort managed by the U.S. Department of Energy's Research Technology Investment Committee (RTIC). This Roadmap ...

The DOE has recently issued a document, Grid Energy Storage,<sup>1</sup> which lays out its strategy and plans for energy storage. This strategy document is intended as a complementary document to ...
