Will New York deploy 6 GW of energy storage by 2030?

New York will deploy 6 GW of energy storage by 2030 under a framework approved Thursday by the New York Public Service Commission, the office of Gov. Kathy Hochul, D, said in a press announcement.

How many GW of storage will the PSC order entail?

The PSC order targets 3 GW of new utility-scale storage, 1.5 GW of new retail storage and 200 MW of new residential storage in addition to the 1.3 GW of storage assets already deployed in the state.

What is New York's 6 GW storage target?

The 6 GW storage target represents at least 20% of New York's peak electricity load and could trim nearly \$2 billion from projected future statewide electric system costs as New York works toward generating 70% of its electricity from renewable sources by 2030, the announcement said.

What is New York's first bulk energy storage request for proposals?

New York Gov. Kathy Hochul has launched New York's first bulk energy storage request for proposals (RFP), intended to procure 1 GW of bulk energy storage as part of New York's 6-GW energy storage roadmap. An energy storage project in Hubbardston, New York. (Credit: Greg M. Cooper/Borrego)

How much energy storage does New York have?

New York has awarded about \$200 million to support about 396 MW of operational energy storage assets and has more than 581 MW of additional storage "under contract with the State and moving towards commercial operation" as of April 1, the governor's office announcement said.

What is the retail energy storage program (retail program)?

Retail Energy Storage Program (Retail Program) The Retail Program will be allocated \$891.5 million for incentives, from the \$1.2 billion program budget authorized by the 2024 Order.
