

# Energy storage spear

Who is spear power systems?

About Spear Power Systems Founded in 2013 by experienced energy storage entrepreneurs Jeff Kostos, President & CEO, and Dr. Joon Kim, CTO, Spear designs and manufactures safe, high performance energy storage systems (ESS) for clients with some of the world's most demanding marine, industrial, and defense applications.

What makes spear power systems unique?

Spear Power Systems' energy storage systems are cell-agnostic and include proprietary battery management and monitoring for all lithium-ion chemistries from multiple battery suppliers offering high energy density, modular architecture, light weight, and extreme safety and reliability.

Why did Sensata acquire spear power systems?

Massachusetts-based sensor firm Sensata Technologies recently announced its acquisition of Spear Power Systems, a lithium-ion energy storage provider. The move is aimed at boosting its electrification portfolio while the company pursues more high-growth markets.

How many spear power systems engineers will be added to Sensata?

About 40 Spear Power Systems engineers will be added to Sensata's team through the deal, which is slated to close in the fourth quarter of this year. Financial terms were not disclosed. Spear Power Systems provides advanced energy storage systems targeting the defense, aerospace, and industrial markets.

What is spear power systems' New Deal?

Jeff Kostos, Spear Power Systems' co-founder and CEO, stated in the announcement that the deal will help his company to expand "development, commercial, and operational activities at a pace to meet the rapidly growing need for clean energy solutions."

Why did Sensata exit the marine energy storage area?

The company acquired Spears in August 2021, and the decision to exit the marine energy storage area will enable Sensata (ST) to focus more resources on Spear's aerospace and defense energy storage business. Sensata (ST) is scheduled to present at the BofA Technology Conference on Wednesday.

SAN DIEGO - The Department of Defense last month issued a small contract for a Navy project to develop and provide a modular energy ...
