What is the storage cost calculator?

The Storage Cost Calculator is a decision-support tool for those who want to understand the complex cost structures surrounding storage and storage systems. We have asked three basic questions that will help you make better decisions. Do you want to buy new storage hardware or do you still want to keep your existing system?

How much does the energy storage system cost?

The energy storage system is a 4MW, 32MWh NaS battery consisting of 80 modules, each weighing 3 600 kg. The total cost of the battery system was USD 25 million and included USD 10 million for construction of the building to house the batteries (built by Burns & McDonnell) and the new substation at Alamito Creek.

How to calculate power storage costs per kWh?

In order to accurately calculate power storage costs per kWh, the entire storage system, i.e. the battery and battery inverter, is taken into account. The key parameters here are the discharge depth [DOD], system efficiency [%] and energy content [rated capacity in kWh]. ??? EUR/kWh Charge time: ??? Hours

What is a battery storage evaluation tool?

These tools serve the energy storage market, which is expected to grow rapidly. The Battery Storage Evaluation Tool is a computer model that simulates the use of an energy storage system to meet multiple objectives. An energy storage device can be charged and discharged in different ways over time.

Does the storage calculator support battery deployment with or without PV attachments?

The storage calculator supports battery deployment with and without PV attachments, and provides precise recommendations on optimal battery sizing and PV capacity to improve the IRR.

What is the optimal sizing tool for battery storage in grid applications?

The Optimal Sizing Tool for Battery Storage in Grid Applications looks at energy storage systems on the consumer side. It determines the benefits of placing a battery storage system behind-the-meter, that is, on the consumer's property, rather than as part of the electric grid/utility.
