

# Epsolar duo battery solar controller

What is a duo solar charge controller 12/24v 10A?

EP Solar Duo-Battery Solar Charge Controller 12/24v 10A: Our Duo Solar Charger will charge 2 separate and isolated battery banks simultaneously. This eliminates the added cost needed for two separate controllers and panels for instance if you wanted to charge both the leisure battery and engine starter battery in a motorhome.

What is EP Solar MPPT dual battery solar charge controller?

The EP Solar MPPT Dual Battery Solar Charge Controller is perfect for motorhome and campervan systems. It charges your leisure battery and trickle charges your vehicle battery while maximizing the sun's power, minimizing power loss, and increasing efficiency by up to 30%.

How does a duo solar charger work?

Our Duo Solar Charger will charge 2 separate and isolated battery banks simultaneously. This eliminates the added cost needed for two separate controllers and panels for instance if you wanted to charge both the leisure battery and engine starter battery in a motorhome. Features :

How many watts can a duo solar charger charge?

Suitable for 12v and 24v and up to 10A. 100 watts of solar when connected to a 12v battery system and 200w of solar panels when connected to a 24v battery system. For larger solar panels please see 20A version. Our Duo Solar Charger will charge 2 separate and isolated battery banks simultaneously.

What are the features of duo-battery controller?

Page 2 Major feature of duo-battery controller: (Note: connect the components as the 1-6) Connect with the battery #1 Connect with the battery #2 Connect with the PV. Remote temp. sensor A connection point for RTS (option) to remotely monitor battery temperature. Local temp. sensor Measures ambient temperature.

Can You charge a motorhome with two solar panels?

This eliminates the added cost needed for two separate controllers and panels for instance if you wanted to charge both the leisure battery and engine starter battery in a motorhome. Suitable for 12v and 24v and up to 10A. 100 watts of solar when connected to a 12v battery system and 200w of solar panels when connected to a 24v battery system.

View and Download Epsolar EPIPDB-COM series instruction manual online. duo-battery charging solar controller, For RVs, Caravans, and boats. EPIPDB-COM series inverter pdf manual download.

Dual battery charging capability making it great for RVs, caravans, and boats. With its advanced PWM charging technology, your batteries will be protected from discharging and over-charging.

Our Duo Solar Charger will charge 2 separate and isolated battery banks simultaneously. This eliminates the

# Epsolar duo battery solar controller

added cost needed for two separate controllers and panels for instance if you wanted to charge both the leisure ...

The EPIPDB-COM 10~20A solar charge controller is ideal for motorhomes, caravans, boats or anywhere there are two independent batteries.

Efficiently charge dual batteries with the EPsolar 10A controller. Perfect for RVs and boats, it ensures optimal battery performance. Order now!

Our Duo Solar Charger will charge 2 separate and isolated battery banks simultaneously. This eliminates the added cost needed for two separate controllers and panels for instance if you ...

The MPPT charge controller DuoRacer from EPSolar was specially designed to charge two batteries in a solar system at the same time. Several battery types (Sealed, Gel, Flooded, ...

These solar controllers are designed for use with solar panels to charge batteries in RVs, Caravans, and boats. The controllers feature automatic 12/24V detection, dual battery ...

View and Download Epsolar EPIPDB-COM series instruction manual online. duo-battery charging solar controller, For RVs,Caravans,and boats. EPIPDB-COM series inverter pdf manual ...

About this item Two battery charging eliminates the extra cost of two separate solar charging system, Intelligent System Optimum Control 12V/24V auto work, Battery type selection, ...

While battery #1 is fully charged, more charge current will be diverted to battery #2, and return to the setting charging automatically when the battery #1 is in low voltage.
