

Eufy power source battery or solar

It is simple. If you want any solar power you have to set it to solar. You can then use receive both power from direct sunlight and USB charging. If you set it to battery it ...

Let's face it - when your eufy security camera starts blinking that low-battery warning at 2 AM, you're not just losing sleep over potential porch pirates. You're probably wondering: "Should I ...

When using the S340 SoloCam with the solar panel it comes with, should I be selecting "Battery" or "External Solar Panel" as the power source? The default setting seems to ...

If you switch the power setting to battery, this icon will disappear and the solar panel will only charge the battery. You cannot change how or stop the solar panel from ...

In the first case (intermittent charging), I would assume the correct setting for "Power Source" would be "Battery". My question is, in the second case (continuous charging), ...

When I set it up, the Power Source was defaulted to Battery. I changed it to "External Solar Panel" as this was the closest thing to telling it to use solar instead of battery.

On the newer cameras I do believe if you have it on solar mode it will only charge the battery if it falls below 97 percent to protect the batteries longevity.

I charged the cam by solar yesterday from 27 to 37% in the "battery" setting and it is already charging today, from 36% to 38% since the sun came up. As soon as I switch to solar in the ...

A place to share configurations, best practices, tips, and complaints on the new Anker/Eufy EufyCam. This Reddit is aimed at the education and support for the community.

I charged the cam by solar yesterday from 27 to 37% in the "battery" setting and it is already charging today, from 36% to 38% since the sun came up. As soon as I switch to ...

If you switch the power setting to battery, this icon will disappear and the solar panel will only charge the battery. You cannot change how or stop the solar panel from charging the battery.
