

Fenix 6s pro solar battery life

Is the Garmin Fenix 6 a solar-powered watch?

The Garmin Fenix 6 is a solar-powered watch. Garmin have recently launched a number of solar powered watches where the battery life can be extended thanks to solar energy. In this review, I will go through the most important features of the Garmin Fenix 6 Pro Solar.

Does the Fenix 6 Sapphire run out of power?

The Fenix 6 Sapphire, without the solar feature, ran out of power on Day 10. In contrast, the Fenix 6 Pro Solar provided an additional battery life of about 12 hours. This corresponds to a 5% battery life extension. During the two-week period, I went for 8 runs and spent approximately 2-3 hours outside each day.

What's new in the Fenix 6 & 6 pro solar watch?

The bigger change relates to its glass. Unlike the regular Fenix 6 and 6 Pro, the Solar uses custom "Power Glass" to coat the screen. This is the main selling point for the watch. The glass aims to help improve battery life when the watch is used outdoors.

How long does a Garmin Fenix 6 Sapphire last?

During the testing period, I wore both the Garmin Fenix 6 Sapphire and the Garmin Fenix 6 Pro Solar for two weeks and exposed them to exactly the same conditions. The Garmin Fenix 6 Sapphire (without SOLAR) ran out of power on Day 10, while the Garmin Fenix 6 Pro Solar lasted about 12 hours longer. This corresponds to a battery life extension of about 5%.

Does the Fenix 6 Pro Solar do a lot of workouts?

I've done piles more workouts with the Fenix 6 Pro Solar since early June. In fact, almost every workout you see on Strava since then has been with the Fenix 6 Pro Solar. Rides, runs, hikes, stand-up paddleboarding both in the forest and city - all that unit. For example, here's a paddle with it around Amsterdam.

Are the Fenix 6 & 6s solar panels the same as the 6x?

When it comes to the Solar aspects added to the Fenix 6 & 6S, they're basically identical to that of the Fenix 6X Solar that was launched last summer. Whereas if you looked at the new Garmin Instinct Solar units, those have a different panel arrangement than the Fenix series.

Maximizing the Battery Life You can do several things to extend the life of the battery. Change the power mode during an activity (Changing the Power Mode). Turn on the battery saver feature ...

With up to 14 days in smartwatch mode and 36 hours in GPS mode (plus solar charging!), this rugged wearable laughs in the face of conventional battery limitations.

Then under this is the slightly more compact Fenix 6S that touts a 42mm case and slightly lower battery life.

Fenix 6s pro solar battery life
