

# Fire control in electrochemical energy storage room

How is information transmitted between fire control room and energy storage station?

The information between the fire control room and each energy storage station can be transmitted by optical cable or wireless communication, and based on the communication protocol DL/T634.5101 and DL/T634.5104, the relevant secondary equipment is deployed in the security II area.

What are the characteristics of electrochemical energy storage power station?

2.2 Fire Characteristics of Electrochemical Energy Storage Power Station Electrochemical energy storage power station mainly consists of energy storage unit, power conversion system, battery management system and power grid equipment.

What is the function of the Fire Control Room?

The Fire Control Room is the nerve center for the building, located inside, where the building's fire protection systems, fire pump, secondary water supply, air-handling systems, stairwell door controls, communications, and elevator controls are located.

Are electrochemical energy storage power stations dangerous?

However, with the increase of projects of the electrochemical energy storage power station year by year, some electrochemical energy storage power stations have suffered safety accidents in turn, and the fire danger has emerged gradually.

Are energy storage systems a fire risk?

However, a number of fires occurred in recent years have shown that the existing regulations do not show sufficient recognition of the fire risks of energy storage systems and specific fire early warning methods and fire-fighting measures have not yet been developed.

Can energy storage power stations monitor fire information?

Fire information monitoring At present, most of the energy storage power stations can only collect and display the status information of fire fighting facilities (such as fire detectors, fire extinguishing equipment, etc.) in the station.

**ABOUT THE ENERGY MARKET AUTHORITY** The Energy Market Authority ("EMA") is a statutory board under the Ministry of Trade and Industry. Our main goals are to ensure a ...
