

What is fishery financial policy?

Fishery financial policy is a vital tool to promote the development of the fishery economy. Based on 179 policy documents, this article traces the evolution of fishery financial policies in China since 1982, using the method of word frequency analysis, co-word analysis and multi-dimensional scaling analysis.

Should fishery insurance companies cooperate with each other?

It is recommended for current fishery insurance companies to strengthen cooperation with each other, in particular to introduce advanced management experience and systematically cultivate talents by school-enterprise cooperation platform.

How to improve fishery insurance?

This paper suggests the following improvement strategies: reforming the fishery insurance legal system, refining the subsidy structure, expanding financing channels, designing innovative products, building a professional talent team and improving insurance publicity. 1. Introduction

What is fishery insurance & how does it work?

Taking Japan, South Korea and France as examples, fishery insurance is treated as an underlying compulsory mechanism to ensure fishermen maintain reproduction capacity after suffering heavy losses.

How should the government integrate fishery economic policies?

The government should integrate the policies of various fishery economic departments to form a "multi-regulation integration", further enhance the coordination and integration of industrial policies, fiscal policies and financial policies.

What is policy-based fishery insurance?

The policy-based fishery insurance is no longer limited to simple financial subsidies. New cooperation models, such as mutual-commercial insurance, basic-additional insurance, additional marine aquaculture reinsurance, etc., have been piloted.
