

G shock tough solar battery replacement

How much does a G Shock battery cost?

Financially speaking, the difference is between solar and non-solar G-Shocks insignificant. A new solar battery will cost you about \$25, and you'll need one every 12 years or so. A regular G-Shock will need a new battery every 5 years or so, and those are cheaper than solar ones (if you change them yourself).

How long does a Tough Solar G-Shock battery last?

The short answer is that your Tough Solar G-Shock's battery will last for anywhere from 9 to 15 years before you have to get a new one, depending on how you use it. Specifically how long it will last comes down entirely to how you use the watch.

How much does a Tough Solar G-Shock cost?

Here's some perspective. Back in the day, Casio used to put Tough Solar only in their elite "Master of G" line. Only the most expensive, cutting-edge G-Shocks had this technology. If you wanted a tough solar G-Shock, \$200 was the cheapest that you could expect to pay.

Can a Casio G-Shock battery be replaced?

Replacing the battery in a Casio G-Shock isn't as daunting as it might seem. While these watches are designed to be rugged and water-resistant, they also have a thoughtfully engineered interior that allows for battery replacement with the right tools and a bit of care.

Are G-Shock solar watches tough?

G-Shock Tough Solar watches are highly resistant to impact and tough (as their name suggests). They have cases made of resin and mineral crystal dial windows. The bands are plastic. These watches are water resistant, with models offering resistance up to 100 or 200 meters.

How long do G Shock batteries last?

That said lots of standard battery G Shocks have batteries that last over 7 years and have brighter EL's and in some cases more functions. Get the G you like not based on solar or atomic only. G shock batteries cost 2 to 3 dollars on average and are easy to replace and if done correctly (with care) should not effect the water resistance.

I've always heard mixed stuff about this matter. Some have solar batteries from 1996 model that still stays strong for instance. One thing that I know for sure is that when the time will come to replace the battery I will be ...
