

# General manager of japan electric power storage

What is Japan's energy storage policy?

As policy, technology, and decarbonization goals converge, Japan is positioning energy storage as a critical link between its climate targets and energy reliability. Japan's energy storage policy is anchored by the Ministry of Economy, Trade and Industry (METI), which outlined its ambitions in the 6th Strategic Energy Plan, adopted in 2021.

Who manages the electricity market in Japan?

These are: The Japan Electric Power Exchange (JEPX): manages the wholesale market. The Organisation for Cross-regional Coordination of Transmission Operators (OCCTO): coordinates electricity supply and demand plans, manages interconnectors, and runs the capacity market.

Does Japan need battery energy storage?

A Growing Need for Energy Storage The increasing generation of renewables on the Japanese grid has led to various support policies and CAPEX subsidy schemes to support the deployment of grid-scale Battery Energy Storage (BESS).

How is Japan's energy storage landscape changing?

Japan's energy storage landscape is shifting, pushed by household demand, corporate ESG mandates, and domestic battery manufacturing. The residential lithium-ion market, projected to grow at a CAGR of 33.9% through 2030, remains one of the fastest-expanding segments.

What is Japan's first fund dedicated to grid storage batteries?

Japan's first fund dedicated to grid storage batteries begins full-scale operation Raised over 8 billion yen from 11 public and private investors Norbert Gehrke Oct 02, 2024 Share this post Japan Startup Observer Japan's first fund dedicated to grid storage batteries begins full-scale operation Copy link Facebook Email Notes More Share

Does Japan have a capex subsidy scheme for grid-scale battery developers?

Increased generation of renewables requires various forms of energy storage to manage the issues associated with intermittency. Japan has, therefore, introduced two CAPEX subsidy schemes for grid-scale battery developers, excluding co-located projects.

Takashi Morimoto\* Apr. 1979: Entered The Kansai Electric Power Co., Inc. June 2007: Executive Officer, Osaka South Branch Manager June 2009: Executive Officer, Deputy General Manager ...

Meanwhile, the new Koshiki-shima Power Management Center, built from reused batteries taken from electric vehicles (EVs), will have a large-scale storage capacity of 800 kW. We plan to ...
