

Germany hps company energy storage

Does HPS home power solutions offer a hydrogen-based electricity storage system?

HPS Home Power Solutions AG has introduced a new version of its Picea system, a hydrogen-based electricity storage solution for residential applications. The 15 kW Picea 2 system offers 1,500 kWh of storage capacity. The company said it doubled the system output to meet the higher demand caused by the growing use of electric cars and heat pumps.

Will HPS expand production capacity?

Now HPS wants to expand production capacities, also to shorten delivery times. Home Power Solutions (HPS), the Berlin-based developer and manufacturer of the Picea all-season power storage system based on green hydrogen, reports the installation of more than 500 units since its market launch. The systems are primarily designed for buildings.

What is HPS home Power Solutions' Growth Strategy?

"Our growth strategy is to reach the market together with installation companies as quickly as possible," said HPS Home Power Solutions CEO Zeyad Abul-Ella. "With all the improvements, especially those that make the installation process easier, we have created important conditions for long-term partnerships."
