

Hive solar battery review

What is a hive solar battery?

And how you benefit...HIVE Solar Batteries implements cutting edge technology for the use of home solar storage solutions. The Hive 2.9kW battery is a modular solution and is capable of being expanded to 17.4kWh for even greater storage capacity.

Are Hive solar batteries safe?

Hive Solar Batteries only use the safest battery chemistry available on the market - Lithium Iron Phosphate. As a safeguard, we use extra casing for our batteries and have software integration to protect the battery from any potential damage. Media error: Format (s) not supported or source (s) not found

Does Hive have a backup battery?

Backup is an optional extra with these batteries, but the spec sheet makes no mention of whether that back includes forming a microgrid to take frequency control of the solar PV system. The Hive system only has a 3kW inverter (max AC rating in or out) so it will be problematic if the solar PV system is much larger than 3kW. Yeah all good points.

Are Hive batteries any good?

Hive batteries are basically rebadged AlphaESS systems. They've often been offered via snail mail marketing promising really special deals that turn out to be not so special. I'm not a fan of this sort of marketing, nor AlphaESS batteries - so I don't recommend Hive.

Do HIVE Solar Batteries have blackout protection?

HIVE Solar Batteries do not have blackout protection as a standard feature. However, you can add UPS (Uninterrupted Power Supply) for a minimal additional cost, which provides blackout protection depending on the circuits it is wired up to.

What features does the HIVE Solar Battery monitoring app offer?

The HIVE Solar Battery monitoring app offers real-time profit checking and access to local technical support. It also includes free upgrades. The app makes it simple to stay on top of your usage and your solar generation at your convenience.
