

How about studying energy storage engineering in a second-tier university

What can you do at Doerr School of sustainability?

Doerr School of Sustainability Gain engineering, energy science, and earth science skills while exploring the many facets of the energy system including renewable energy, energy resources, energy storage, systems evaluation, and more.

What is a Master's in energy storage?

Master's Programme in Energy Storage is jointly organized by the School of Engineering and the School of Chemical Engineering. The programme is coordinated by the School of Engineering. Energy storage touches every discipline present at every step of the renewable energy value chain; it is the key to energy sustainability worldwide.

Is sustainable engineering a major?

I don't think "sustainable engineering" is really an engineering major. If you want to learn about energy, try electrical engineering. I would say that if you want to do the sustainable energy part I would pursue power type engineering. Power electronic, power systems, energy storage etc, pretty much all of those fields are in demand.

What can I do with an energy engineering degree?

You will gain engineering skills while also exploring the many facets of the energy system including renewable energy resources & engineering, energy storage, energy system modelling, economic evaluation, and more. The program allows students flexibility in exploring energy resources and their utilization as well as energy systems and impacts.

Is energy storage part of EIT InnoEnergy Master School?

Energy Storage is part of EIT InnoEnergy Master school. It is a two-year Master's programme including compulsory mobility for the students. More information can be found on the program's website Read about the experience of our student Albert Rehnberg and follow his path!

What is Energy Science & Engineering?

The curriculum is designed to prepare students for immediate participation in many aspects of the energy industry and graduate school. Learn more about Energy Science and Engineering in the Stanford Bulletin Energy and the Environment (EARTHSYS 101) Fundamentals of Renewable Power (EARTHSYS 102)
