

How to get into the energy storage industry

What makes the energy storage industry so interesting?

The energy storage industry is still fairly young compared to others like wind or solar. This means it's rapidly growing, changing and innovating (part of what makes working in the industry so interesting).

How can we make energy storage more reasonable?

One way to approach making energy storage more reasonable is to make sure it's renewable and ethically sourced. One company working on such a solution is Tesla. They are creating batteries that use less cobalt, a material that often comes from mines in the Democratic Republic of Congo that use child labor.

How many Storage Startups are there in the energy industry?

We analyzed 200 storage startups in the energy industry. Six of them are our picks to watch out for: H2GO Power, Highview Power, Quidnet Energy, Aquion Energy, Solid Power, and Redflow. To learn more about the global distribution of these 6 and 194 other startups, check out our Heat Map!

What makes field a great energy storage company?

The energy storage industry is no exception. At Field, they are the glue that holds us together - whether that's by bringing new talent into the business, negotiating contracts or ensuring we have a strong balance sheet. They're absolutely essential to the Field business, enabling us to do the work we do.

Why do companies invest in energy storage?

The Companies argue that they selected the potential storage project locations in order to demonstrate the ability of energy storage to: (1) offset new upgrades to their distribution system; (2) eliminate the use of aging diesel generators that produce greenhouse gas emissions; and (3) address intermittency and smooth voltage from distributed e...

What is energy storage installation growth?
