

Introduction to the in-depth report on energy storage industry

How big is the energy storage industry?

Industry Growth: The energy storage industry includes over 13900 companies, growing by 3.56% last year, reflecting its expanding market presence and potential. **Manpower & Employment Growth:** The industry employs 1.7 million people globally, with 114000 new employees added last year, indicating substantial workforce expansion.

What is the DOE energy storage program?

The goal of the DOE Energy Storage Program is to develop advanced energy storage technologies and systems in collaboration with industry, academia, and government institutions that will increase the reliability, performance, and sustainability of electricity generation and transmission in the electric grid and in standalone systems.

How much money is invested in the energy storage industry?

Investment in the energy storage industry is robust, with an average investment value of USD 84 million per round. More than 2000 investors have participated in over 5230 funding rounds, supporting over 2,100 companies. This strong financial backing highlights the sector's potential and the confidence of investors in its future growth.

How can governments accelerate the adoption of energy storage technologies?

Governments must implement supportive policies, provide grants, and create incentives to accelerate the adoption of energy storage technologies. The Energy Storage Industry Report 2024 uses data from the Discovery Platform and encapsulates the key metrics that underline the sector's dynamic growth and innovation.

What is energy storage & why is it important?

Energy storage is the backbone of the renewable energy transition, able to offset periods when the wind isn't blowing, and the sun isn't shining. With broad market recognition that energy storage is key to catalysing a future powered by zero-carbon energy sources, the sector is experiencing robust growth.

What is Germany's energy storage strategy?

The government released its Electricity Storage Strategy in December 2023, aimed at supporting the scale-up and integration of energy storage on its grid, putting the technology on the political agenda for the first time. By the end of 2023, there was 937MW/1,322MWh online in Germany and another 485MW/681MWh is set to come online this year.

Further, the energy storage industry report explores high-impact subfields such as virtual power plants (VPPs), flow batteries, and hydrogen storage by offering insights into ...
