

Latest regulations on energy storage charging policy in poland

Does Poland support energy storage?

Poland has adjusted energy sector regulations to support energy storage. In May 2021, Poland amended the Energy Law to establish a clear licensing process and regulatory status for battery storage and eliminate double tariffs for charging and discharging batteries.

What is Poland's energy storage subsidy program?

Following a public consultation launched in July 2024, the Polish Ministry of Climate and Environment has finalized its energy storage subsidy program which aims to support the deployment of more than 5 GWh of energy storage in the country. The new regulation was published in the Journal of Laws of the Republic of Poland on March 7.

How much money does Poland spend on battery energy storage?

Poland has finalized a comprehensive subsidy program aimed at accelerating the deployment of battery energy storage systems (BESS), with a total budget of PLN 4 billion (approximately EUR1 billion).

Why is Poland launching a grid-scale battery system?

The introduction of this storage support program marks a key milestone in Poland's energy transformation. By enabling the deployment of grid-scale battery systems, the country is strengthening its ability to integrate larger volumes of clean energy, reduce dependence on fossil fuels, and enhance power system stability.

What is Poland's energy policy?

Poland's energy policy aims to decarbonise its electricity supply and increase electrification, while maintaining electricity security and affordability for consumers. The number of prosumers - those who both consume and produce power - is expected to increase rapidly to 1 million in 2025.

Does Poland have a battery storage system?

There is limited deployment of battery storage in Poland with total battery storage capacity reaching around 9 MW and 33 MWh in 2020. These battery storage systems are connected to the distribution system and used by DSOs mainly to stabilise the voltage.

In terms of emissions reduction from industry, Poland's policies focus mainly on strengthening energy efficiency and increasing renewable energy. The draft updated NECP highlights the ...

The updated Renewable Energy Sources Act marks a significant step toward the sustainable development of Poland's energy sector. By supporting prosumers, simplifying ...
