

# New energy projects mandatory energy storage

Is the energy storage mandate a big change?

This is a big change towards rationalization of renewables but hidden within that is a removal of the energy storage mandate," George Hilton, research and analysis manager at S&P Global, tells ESS News. S&P Global estimates that the storage mandate has driven between 50 and 75% of domestic demand.

How will the energy storage mandate impact China?

S&P Global estimates that the storage mandate has driven between 50 and 75% of domestic demand. With China accounting for around 56% of the global energy storage demand in 2024, the impact of such a policy change will be massive.

What is new energy storage?

New energy storage, or energy storage using new technologies such as lithium-ion batteries, liquid flow batteries, compressed air and mechanical energy, is an important foundation for building a new power system in China, enjoying the advantages of quick response, flexible configuration and short construction periods.

How many new energy storage projects are there?

According to NEA's Bian, the government has released a list of 56 new-type energy storage pilot demonstration projects since the beginning of this year, including 17 lithium-ion battery projects and 11 compressed air energy storage projects, among others.

What is the implementation plan for the development of new energy storage?

In January 2022, the National Development and Reform Commission and the National Energy Administration jointly issued the Implementation Plan for the Development of New Energy Storage during the 14th Five-Year Plan Period, emphasizing the fundamental role of new energy storage technologies in a new power system.

What is the 14th five-year plan for energy storage?

The "14th Five-Year Plan" has specified development goals for energy storage also on the provincial level. During the "14th FYP" period, 25 provinces and cities plan to complete 77.65 GW new type storage installation. That scale is more than twice the "14th FYP" target (30 GW) set by the NEA.

India's Ministry of Power has mandated all renewable energy implementing agencies and state utilities must incorporate a minimum of two-hour co-located energy storage ...

In a major policy shift towards electricity market liberalization, China has introduced contract for difference (CfD) auctions for renewable ...

The document explicitly states that energy storage configuration cannot be a prerequisite for the approval of

# New energy projects mandatory energy storage

new energy projects, effectively ending the era of administrative ...

In February 2025, China's National Development and Reform Commission (NDRC) and National Energy Administration (NEA) abolished mandatory energy storage ...

The Ministry of Power has issued an advisory mandating a minimum of 2-hour co-located battery storage system for new solar projects, ...

At present, the domestic energy storage market is mainly dominated by distribution and storage demand, and the release of the new policy for new energy power ...

India is likely to follow in the footsteps of China and mandate the inclusion of battery storage capacity for future wind and solar energy projects.

Despite many energy storage manufacturers lamenting that mandatory energy storage has led to unhealthy price competition, it is undeniable that such policies have been a ...

According to NEA's Bian, the government has released a list of 56 new-type energy storage pilot demonstration projects since the beginning of ...

Battery storage equipment and transmission infrastructure at a solar-plus-storage project in Chhattisgarh, India. Image: Ministry of New and Renewable Energy via ...

The government is set to make battery storage capacity a must for upcoming solar and wind power plants, Prashant Kumar Singh, secretary, ...

2 &#0183; The challenge with Renewable Energy sources arises due to their varying nature with time, climate, season or geographic location. Energy ...

The union ministry of new and renewable energy will soon mandate requirement for battery storage capacity for upcoming solar and wind ...

ISO New England has given the thumbs up to a project proposed by Flatiron Energy and envisaging the installation of a 300-MW/1,200 ...

A 10% storage ratio will be a good starting point. In the future, depending on price trends, the mandatory storage ratio may rise to 30-40%." Clearly, India's mandatory solar ...

Energy storage resources have become an increasingly important component of the energy mix as traditional fossil fuel baseload energy resources transition to renewable ...

# New energy projects mandatory energy storage

In terms of storage allocation policies, Xinjiang, Tibet, Inner Mongolia, and Gansu regions are required to equip a certain proportion of storage facilities in new energy projects.

Current revenue streams for front-of-meter storage in India include ancillary services, energy arbitrage, long-term PPAs bundled with renewables, demand-side response, ...

On May 19, the Shanghai Municipal Development and Reform Commission issued the "Management Measures for Reward Funds for the Regulation Capacity of the New Power ...

Conclusion The recent regulatory developments in the renewable energy sector will certainly create a stimulating environment for further development and commissioning of ...

Mexico's energy sector has unveiled a groundbreaking policy, stirring up the global energy storage market and introducing new variables to ...

For energy storage enterprises with advanced technologies, cautious capital entry can also serve as a protective measure. At this stage, energy storage companies need to ...

To date, over 20 provinces have issued policies mandating that renewable energy projects allocate 10% to 20% of their capacity to energy ...

Chinese authorities unveiled several measures on Monday to promote the new-type energy storage manufacturing sector, as part of efforts to accelerate the development of ...

To address these issues, various rapid energy storage methods have emerged as ancillary services, enabling the storage of energy, relieving the pressure on integrating renewable ...

Driven by the national strategic goals of carbon peaking and carbon neutrality, energy storage, as an important technology and basic ...

The National Energy Administration has ordered grid companies to supply enough network connection points for all the solar and wind projects registered in 2019 and ...

The Notice clearly stipulates that "the inclusion of energy storage shall not be used as a prerequisite for the approval, grid connection, or grid access of new energy projects."

From ESS News New renewable energy plants in China will no longer be required to build storage in order to secure development rights and ...

# New energy projects mandatory energy storage

Edison, NJ, Feb. 4, 2025 - CS Energy and Calibrant Energy announce the completion of a portfolio of three stand-alone Battery Energy Storage Systems ...

The notice clearly stipulates the cancellation of the mandatory energy storage policy for new energy projects, marking the exit of the administrative energy storage ...

5 &#0183; Announced by the National Development and Reform Commission (NDRC) and the National Energy Administration (NEA), the new plan is expected to drive CNY 250 billion (\$35.1 ...

This policy aimed to address industry pain points such as inefficient resource allocation, surging cost pressure on new energy enterprises, and the phenomenon of &quot;building ...
